

Dear Astronaut,

This is your very own easy-launch super turbo space rocket! You'll be amazed how fast it goes when you launch it into space! Follow the instructions to see your rocket fly into the air!

To Launch Your Turbo Space Rocket:

1. Have a grownup standing by.
2. Launch your rocket outdoors only.
3. Put on your safety glasses
4. Point the rocket away from the house, pets, other people.
5. Uncork the bottle. Drop the baking soda packet into the bottle and quickly seal it up again.
6. Give the bottle a shake and stand back for liftoff!

Good Luck and Let The Rocket Ride!
